Subject: EPA-HQ-2016--005555 Steam Electric Request Review - UWAG

Ann – this is not part of the larger Steam FOIA. This is a request from UWAG from April 2016 which requests for EPA to release records related to the ELG Rule, but which are not part of the ELG Rule rulemaking record. Specifically, this request seeks those records and portions of records that meet all of the following criteria: (1) they are communications or information exchanged between EPA and environmental organizations ("Environmental Organizations") between August 1, 2005 and November 3, 2015; (2) they relate to effluent limitations guidelines for the Steam Electric Power Generating Point Source Category; and (3) they are not currently part of the public ELG Rule rulemaking record.

Since these email are with parties outside of the federal government, the deliberative exemption does not apply. The redactions that were done were under exemption 6 – personal privacy. It included cell phones, conference lines etc.

This has been reviewed by OGC and DOJ this past January and they are ok with sending it out.

The FOIA and my notes from second level review are attached. I can share link to the responsive documents. Please advise as to whether or not this needs further review.
